

LIGHTNING | SE CHEAT SHEET

Surface the pain. Show the solution. Land the value. JustAsk opens and closes every conversation.

MODULE	PAIN QUESTION + SETUP	VALUE PROP + PITCH LINE
JustAsk CORNERSTONE Always leads. Always closes.	"Let me name three things every shop owner wants to know but cannot get out of their system today - tell me if any sound familiar." - Which tech is costing me money on callbacks? - Which job types are making me money vs just keeping me busy? - Which customers have open invoices and are still being scheduled? Hand them the questions. Let them react. Then show JustAsk answering all three.	<i>Every job, invoice, and hour in Simpro is locked behind reports nobody runs. JustAsk turns it into a plain English conversation. Ask anything. Get the answer. No report, no analyst, no middleman. 6% vs 24% - that gap is not effort. It is knowing where your business stands. "If you do nothing else with Lightning, JustAsk alone pays for the upgrade. That time is yours back - starting Monday."</i>
FieldReady Training Agent Before the job	"When you bring on a new tech - how long before they are really performing the way your best person does?" Listen for: inconsistent onboarding, owner doing all training, good techs walking because nobody had time for them.	<i>Every tech learned the process differently - like a telephone game. By the fifth person it barely resembles what you intended. FieldReady creates one standard. Every tech. Every time. "Good techs are hard to find. Losing one because nobody had time to train them properly costs you \$15,000 to \$25,000. That is a number worth protecting."</i>
JobReady Job Prep Agent Before the job	"When a tech leaves for a job in the morning - what do they actually know about what they are walking into?" Listen for: techs figuring it out on the way there, wrong parts, second trips.	<i>Everything the tech needs is already in Simpro. JobReady pulls it into one briefing automatically - job history, site details, customer notes, parts data. One screen. Nothing to click through. Nothing left out. "Every second trip costs you a truck, a tech, and a customer wondering why you did not get it right the first time."</i>
JobScribe Doc Agent On the job	"After a tech finishes a job and drives back - what do the notes look like?" Listen for: incomplete notes, office chasing techs, billing disputes from missing documentation.	<i>Techs hate paperwork. Always have. Notes end up incomplete or not written at all. JobScribe removes the step entirely - the tech talks, the system writes. Clean professional documentation. Automatically. "Incomplete documentation drives billing disputes. JobScribe gives every job a complete record - without asking your tech to do anything they were not already going to do."</i>
JobBrief Customer Summary After the job	"After a job is done - what does the customer actually receive?" Listen for: angry calls asking what the tech did, disputed invoices, facilities managers who have to justify spend upward.	<i>Residential: the angry call - "What did your guy even do?" Commercial: the facilities manager justifying spend to their boss with nothing but an invoice. JobBrief sends a professional summary automatically. What was done. What was found. What is next. "You are not just making your customer's life easier - you are making them look good in front of their boss. That keeps a commercial contract."</i>
2-Way SMS + GPS Time Platform features	"How do you communicate with customers on the day of a job?" and "How are your techs logging time?" Do not lead with these. They close the conversation, not open it.	<i>Two-Way Messaging: confirmations, ETAs, follow-ups sent automatically. Office stops making calls one by one. GPS Time Tracking: clock starts on arrival, stops on departure. No timesheets. No disputes. T&M; margin protected. Both built in. Both working from day one.</i>

THE VALUE: "Five full-time roles your shop could never afford to hire. Lightning puts all five on your payroll." **THE CLOSE:** Always return to JustAsk. **PRICE OBJECTION:** "You are not paying more for what you have. You are adding five roles you have never been able to afford."
